

VEHICLE AIR FRESHENER

ABSTRACT OF THE DISCLOSURE

A vehicle air freshener is constructed to include a bottle
5 holding a color fluid and a volatile liquid perfume floating on
the color fluid, a socket fastened to the bottle neck of the bottle
to hold an absorptive core member that dissipates the volatile
liquid perfume into air outside the bottle, a weight-attached
ornament set in the volatile liquid perfume and the color fluid, a
10 base fastened to the bottom side of the bottle and adapted to
support the vehicle air freshener on a surface; and a bottle cap
fastened to the bottle neck of the bottle around the socket, the
bottle cap having a center through hole, which receives the
bottleneck of the bottle, and a plurality of wire holes for
15 mounting cord members.
